DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because prior art fails to teach or make obvious a double crystal analyzer linkage, comprising:

first and second linkages sliding in a first and second pathways of a right angle slide and connected respectively to a first and second means to secure a first and second diffracting crystals so as to constrain planar surfaces of the diffracting crystals to remain parallel to one another as a first and second movable axis pivot points move along the first and second placed apart, parallel linear pathways;

an in-line slide connected to and pivoting about the fixed pivot point, the in-line slide having third and fourth pathways passing therethrough parallel to but spaced apart from one another; and

third and fourth linkages sliding in a third and fourth pathways, respectively, and connected respectively to the first and second means to secure the first and second diffracting crystals so as to constrain the diffracting crystals to be equidistant from the fixed pivot point as the first and second movable axis pivot points move along the spaced apart, parallel linear pathways as claimed including all of the limitations of claim

1. Claims 2-12 are allowed by virtue of their dependence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Larson et al. (US Patent 5,444,242), Wittry (US Patent 5,892,809), Wilkins (US Patent 5,850,425), Kikuchi (US Patent 6,574,306 B2), Guenet et al. (US Patent 3,906,225), Cocks et al. (US Patent 4,821,301) and Bartels (US Patent 4,567,605) teaches the X-ray analysis apparatus comprising the crystal analyzers.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irakli Kiknadze whose telephone number is 571-272-2493. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ed Glick can be reached on 571-272-2490. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
